IN LONDON

What Royalty Buys For Holiday Gifts.

LONDON, Dec. 5.-The grip is unusually severe this winter and has already been felt throughout England, with the result that all who can do so are leaving. Hundreds of people are on their way to India to attend the Delhi Durbar and thousands are flocking to the South of France and the Channel

Christmas house-parties are being orwhere the frost is rapidly spoiling the hunting and driving the "guns" indoors to less strenuous recreations, such as bridge-whist and amateur theatricals. In East London the winter is having a very different effect. Thousands of unemployed persons daily congregate at the dock yard gates, literally fighting for a chance to de a day's work. Unskilled laborers there are in strong force and the police find it necessary to protect the foremen who distribute the work tickets each morning.

ROYAL GIFTS.

which can afford Christmas gifts is watching the purchases of the members of the royal family in order to follow suit. King Edward's gifts this year run largely to pen and pencil holders, cigarette cases and delicate enamel work set with a new variety of soft tinted, semi-transparent stones heretofore unknown in the realm of jewelry, Queen Alexandra is also partial to enamel work. This year she is giving many photographs in artistic enameled toria usually favored silver for the known fondness for pearls leads her to

clever painter and a good musi Portuguese ballads.

THEATERS AND POVERTY. It is long since the London theaters

and restaurants have experienced so profitable a season as the present. The West End is ablaze with light nightly, all the amusement places are crowded and theater supper parties keep the fashionable hotels and restaurants busy until long after midnight. In the meantime it is estimated that 500,000 people are idle in the Kingdom and the board of trade returns show the largest percentage for ten years past of unskilled persons out of work, while the proporis constantly growing. The Woolwich arsenal authorities have discharged two thousand mechanics since the winter set

CLAIMS

Good Assurances Given to Pratt.

(Special to the Advertiser.)

WASHINGTON (D. C.), December 1. -There were several people of Hawaiiing of Congress. Mr. J. G. Pratt of Honolulu came in this morning, and, after both houses had adjourned, went down to the House restaurant, where he enjoyed a light lunch with some friends. He has begun work immediately and received some words of encouragement. I told in a recent letter how Mr. william Haywood, who was also at the Capitol this afternoon, had started the work of the fire claims by having the international aspect of the matter developed by the ministers of China, Japan and Portugal. Mr. Pratt was told this morning by a prominent Senator, who is a friend of Hawaii, that that aspect of the case would undoubtedly give it better standing before Congress and he believed it would have a fair chance of favorable action from Congress at this session.

Delegate Wilcox, as is already known in Honolulu, crossed the Pacific in the same steamer with Mr. Pratt, but he has tarried en route, and will not be here for a day or two yet.

QUARANTINE STATION.

The estimates of the Secretary of the Treasury, forwarded to Congress today, contain several items for Hawaii. The secretary asks \$65,000 for a disinfecting wharf and runway complete at the Quarantine Station at Honolulu. He asks \$10,000 for barracks for housing Orientals undergoing detention; \$5,000 for a laundry plant, including machinery and building, and \$10,000 for a retaining wall around Quarantine Island. It is probable that a part of this money may be appropriated at this session, but doubtful WASHINGTON, December 6 .- Presi- whether Congress will be willing to the maintennce and ordinary expenses, including pay of officers and employes.

ISLAND SALARIES.

Other items for Hawaii included in the annual estimates to Congress are \$5,000 for the salary of the governor; IN A BAD WAY \$3,000 for the salary of the secretary; \$15,500 for the salary of the chief justice and two associate justices; \$23,500 for the salaries of circuit court judges; and \$3,000 for contingent expenses. These items will all be appropriated in the sums mentioned, without doubt, as will an item of \$4,200 for the payment of the salaries of the clerk and reporter of the United States district court for Hawaii, at \$3,000 and \$1,200 respectively.

LIGHTHOUSE SERVICE.

Another Hawaiian item inserted in the estimates is \$25,000 for maintaining the existing lights on the Hawaiian Islands. It is accompanied by a foot note that "from the reports of the Hawaiian commission it is found that this is about the amount which it will cost to maintain the Hawaiian lights now in operation, based on the cost of maintaining similar lights in this country."

NO RECIPROCITY.

The hopes of any treaty with Cuba on reciprocity lines during the present session become more and more remote The arrangements for a treaty, which seemed all under way three or four weeks ago, seem now to have been entirely disconcerted and the prospects tions. The session will be short and there will be a great press for time to attend to other matters that must in next.

COINAGE BILL.

Representative Hill, of Connecticut. who is a member of the committee on who has taken an active interest in the Hawaiian coinage bill, said today that it would be easily adopted by the House at this session, which would insure its becoming law.

ERNEST G. WALKER.

Oil on Boads.

LOS ANGELES, Dec. 5- James W. Abbott, head of the Rocky Mountain nual report to the federal authorities and Pacific Coast division of the "Good Reads" office of the government, is in erritory that gets particular mention Los Angeles on a special mission. He in the report. The commissioner says: is visiting Southern California at the direction of Secretary of Agriculture in the Hawalian Islands have been Wilson, in order to observe the use of off on the roads. "I consider," he said, that the methods of oiling roads as inaugurated in this district, ranks in revenue are properly enforced and to importance in the history of highways punish infractions. Reports show that with the discovery of the 'macadam' system of roads. It is a great thing in modern road building."

An Explosion Destroys a Kalihi Home.

Careless handling of nearly twenty pounds of giant powder caused a terrific explosion about 6 o'clock yesterday morning in the house of Kaiapoepoe, a Hawaiian, in Kalihi Valley, about a mile and a quarter above King street, on the road leading past the Cummings place. As a result of the explosion Kekaha, a native about 20 years of age, was blown to pieces. Other inmates of the house were Kalehua, about the same age, who now lies in the Queen's Hospital with both eyes mutilated, his ear drums shattered, with few chances of surviving the shock, as he had not recovered consciousness up to a late hour last night. Mrs. Kaiapoepoe sustained injuries in the head, neck and shoulders, and the end of one of her fingers is missing, while small splinters of wood were driven into her body. Paukeaho, aged about 50, was severely burt by timbers falling upon him.. Sam Kekaha, a boy aged 9, was blown through the house and landed some distance away, although he was not badly hurt. Aikahele, a girl aged 15, and Paulo, a boy the former, in fact, being the only one who really escaped injury.

believed that a heavy blast had been something to encourage it. discharged in the Kalihi quarry. There; ed off the dynamite to destroy his family and others. Kaiapoepoe, however, took place, and was then in the house of a neighbor. Even when he viewed the scene of the catastrophe, he was unable to comprehend its full significance, and was taken to the station house to sober up.

Deputy Sheriff Chillingworth was notified of the affair about 8:30 and vis-They found that the house had been blown to smithereens and evidences of here.—Herald. the terrific force of the explosion were shown in the distance to which portions of Kekaha's body had been carried. Part of a leg was found in one place, the head in another, and so on.

From what the deputy sheriff could gather, Kekaha had risen early and powder was kept. Kekaha worked at the government quarry and probably had brought the explosives, piece by piece, to the house. As it was a rainy morning and there was nothing to do out of the house. She remembers dress was by Rev. F. L. Nash. nothing more, except that a terrific explosion came at that instant. Mrs., Kajapoepoe stated later that her relations with Kekaha were friendly, but not intimate. The police believe that the explosion was due to an accident.

Most of the other inmates of the house were asleep when the stick went off. Sam Kekaha, the boy, says the first he knew of it was when he was blown from his bed into the air and struck the ground outside. Mrs. Kaiapoepoe was pinned under the wreckage of the house, while Kalehua, who was near the place where Kekaha was last seen, received the full sweep of the concussion. He was rendered unconscious, and when picked up by the police it was seen that his sight was gone and that his ears were mutilated

Samuel Kalihama was the first man to reach the scene of the tragedy. He 49 yards distant, at the time the explosion occurred, and ran at once to the wrecked cottage. He found nearly everyone of the inmates lying or sitting on the ground, stupefied and in-Kalehna seemed to be the worst off. He helped old Paukeaho to get out from under the wreckage on the Ewa side, and then notified the

POWDER W. H. Eustis Arrives In Town of Hilo.

HILO, December 12.-W. H. Eustis of Minneapolis has arrived here on a mission from Secretary Shaw to recommend a site for a Hilo Federal "We shall commence to look for the from the Cliff House heights to the building. As planned now there will Silvertown with the cable on Christmas Walkiki beach is coiled in the three bears and provided in the cable on Christmas of the ship. The main tank is be no public meetings, because the citizens of this city have already agreed day." upon a site for the building.

The people of Hilo are a unit for the selection of the large tract between Bridge and Pitman streets and Waiatnuenue street and the river. This, it is believed, will not only allow sufficient room for a building sufficient for the accommodation of all the Federal offices, but will permit also of laying spent his time interviewing the citizens, and, because of the unanimity of their opinion, does not believe a public meeting is necessary.

Mr. Eustis expects to return to Honolulu on the Mauna Loa Tuesday. PECK IS HOPEFUL.

Philip Peck returned on the Enterprise from San Francisco, where he has been seeking to interest capital in the Kohala-Hilo Railroad.

The people with Mr. Peck says: whom I talked in San Francisco regarding the railway look with favor upon the scheme, but before taking action or decided steps in subscribing aged 19, were little more than bruised; to either the stock or bonds of the company they wish to know what the people here will do toward it. If, as The explosion was heard all over we think, it will be a good thing for town, and sound sleepers were awak- this side of Hawaii to have a railway, ened by the shock. It was generally the capitalists think we should do

"It is the custom on the mainland were several versions of the cause of for communities to encourge railway the explosion. One was that Kaia- lines by offers of subsidies, and these noepoe and his wife had not been on are usually raised by individuals, either good terms for a few days, and that he in public meetings or upon personal returned yesterday morning and touch- solicitation. The question of subsidy above. was not specially dwelt upon, will the people of Hilo do?' covers was very drunk when the explosion everything. As soon as possible I will confer with the citizens and that question will be answered."

Mr. Peck did not appear to be discouraged over the results of his conferences. During the past year plantation agents and managers have frequently expressed themselves favorably to the project and there is reasonited the place with a coroner's jury, able assurance that at least a portion of the capital invested will be raised

RICE MILL FOR HILO.

in Puueo, is building a rice mill on Furneaux and Front streets, and will soon have it in operation. The mill will cost in the neighborhood of \$2,000 gather, Kekaha had risen early and and Mr. Hamada has orders in the rains, and arrangements have now been the connection.

Judge De Bolt yesterday reduced the bail of B. Haywood Wright from \$10,-000 to \$8,000 on the indictment against him charging two embezzlements of government money. Wright will probably be released today, having made arrangements to give his bond. This was the first time any application of any kind had been made before Judge De Bolt touching upon a bond for Wright.

In the morning Judge Estee rendered diction of the Wright case, and stating that it was one for the Territorial courts exclusively. The prisoner was remanded to the custody of the high sheriff. In his oral opinion Judge Estee said:

"The powers of this court are statutory, and this court has no powers except those which are given it by statute. This court has the right in cases where the statutes of the United States are being violated to interfere, but the Supreme Court of the United States has several times decided that only in very important or extreme cases, should the United States district courts interfere with the other courts. I do not say the acts of the other courts in this case were improper, illegal or unconstitutional, because I am not going to take jurisdiction, and, as I said during the course of the argument, I shall not do so because I think it would be interfering with the free exercise of judicial judgment on the part of the circuit court upstairs. Let me repeat that I don't think that this court should interfere except in very extreme cases where the laws or constitution of the United States are clearly being violated. I don't think the question of fixing bail in this case is one of these. There can be cases where requiring excessive bail or a failure to try a case would be a violation of the constitutional provisions which guarantees a man a fair and speedy trial and declare that no excessive ball shall be required.

"In this case I think it will be highly improper to allow the present term of the circuit court to go by without giving the defendant a fair trial, regardless of whether his attorney asks for it or not. It is a right a defendant has, regardless of his counsel to be tried. The policy of the law is that no one shall be kept in jail longer than is absolutely necessary, for the purpose of trial. I do not say that in this case the defendant is not being given an caused by the rains, the longest section one-third mile which extends from the early trial, because I have no authority

MUTINEERS

Shearwater Now GovernmentLands New Apparatus for the Over Ten Inches on Way to Pitcairn.

British sloop-of-war the Shearwater, which was recently in Homolulu, arrives at Pitcairn Island a portion of her crew will probably take in charge three of the vilest murderers that have courted a nangman's rope, for three mutineers who escaped from the British ship Leicester Castle, after mutinying and killing the second officer of the vessel, are supposed to have reached the lonely colony of the families of the mutineers of the famous British ship Bounty on a hastily constructed raft. The British ship arrived in Queenstown with this story on December 5 and, if the British authorities acted promptly, they had time to cable a message to the Shearwater, which is probably at Fanning Island now, and the sloop's officers can do the rest as they are bound for Pitcairn

Dispatches from Queenstown, Ircland, give the following particulars:

Three American sailors are alleged to have killed the mate and shot the captain of the British ship Luicester Castle, after which they fled from the vessel by taking a frail raft in the middle of the South Pacific. Such is the report of Captain Peattle of the Leicester Castle, which left San Franacisco July 26 and arrived here today. The alleged mutineers are W. A. Hobbs of Illinois, James Turner of Portland, Ore., and Ernest Sears of Idaho. Nothing has been heard of them since and it is presumed they perished, either from hunger and thirst or by storm. The murdered mate was named

The mutiny occurred September 2, when the vessel was about 300 miles north of Pitcairn Island. The Americans joined the ship at San Francisco in place of English sailors who had left for reasons not yet explained.

"I was going to sleep on the night of the trouble," says Captain Peattie in his report to the authorities "when Ernest Sears, an able seaman of San Francisco, called me and said a man had broken his leg. I went out into the cabin. When I entered it Hobbs, another seaman, stepped up to me and said: 'Now then, Captain,' and st the same time he fired point blank at my heart. The bullet entered my breast a little over the heart. I closed with him and we had a rough and tumble fight of it in the cabin, during which I was wounded in the arm, and battered about the head with a club.

The mate came to my assistance. Hobbs killed him with a shot through the heart. Then help arrived and Hobbs made off. He left me terribly wounded with five bullet holes, and otherwise injured by clubs.

The first mate took charge of the He called the crew aft and made an endeavor to secure the captain's assailants, but they kept forward and nobody dared face their revolvers. When morning broke, however, they were discovered floating past on a raft which they had constructed during the darkness. We let them go The first mate thought it made good riddance to bad rubbish. He did not have the facilities on board to take care of three idle murderers.

"The mutineers made their frail raft the night. They put some provisions

the mutiny He supposes it was the intention of the mutineers to murder the officers and the men who refused to join them and take the ship to Pitcairn Island.

Pitcairn Island is a solitary Island in the Pacific ocean, situated in about latitude 25 south and about 130 west. It is two and a quarter miles in length and has but one landing place at Bounty Bay The island is famous as the scene of the foundation in 1790 of a remarkable colony composed of mutineers from the British sh.p Bounty

Wednesday morning the steamer Nevadan arrived in Kahului, Hon, H.P. Baldwin, who has just completed his senziorial duties, Mr. Wise, manager of the Paia Plantation store, who has been enjoying a six-weeks' outing on the mainland, Mr and Mrs F. F. Baldwin, who returned from the polo tournament, and Mr Jas. Kirkland, of Kahului, who has been on a short business trip to Honolulu, were passengers on the freignter.

FROM THE MAUI NEWS. MAUI, Dec 13. - The Maui News makes the Maui polo boys responsible for the story of the alleged clever game played by the Honolulu polo players at the recent tournament. The paper says that Hawaii, having the weakest team was played against Oahu, and the Maui and Kaual teams were incited against each other by cleverly worded letters written to each team from Honolulu against Maui.

Walluku won the football game at Lahaina last Sunday by a score of 10 Puunene mill is running day and

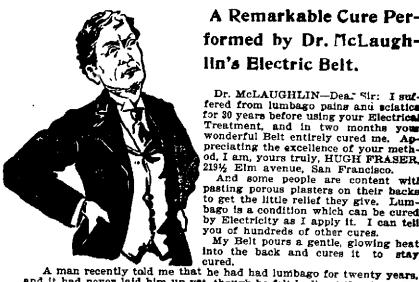

orly in the daytime Judge Kapoikal is expected to return to Maui shortly, to wind up his affairs

in Honolulu.

Lumbago 30 Years

A Remarkable Cure Performed by Dr. McLaughlin's Electric Belt.

Dr. McLAUGHLIN-Dear Sir: I suffered from lumbago pains and sciatica for 30 years before using your Electrical Treatment, and in two months your wonderful Belt entirely cured me. Appreciating the excellence of your method, I am, yours truly, HUGH FRASER, 2194, Elm avenue, San Francisco. And some people are content with

pasting porous plasters on their backs to get the little relief they give. Lumbago is a condition which can be cured by Electricity as I apply it. I can tell you of hundreds of other cures. My Belt pours a gentle, glowing heat into the back and cures it to stay

a man recently that me that he had had lumbago for twenty years, and it had never laid him up yet, though he felt badly at the time. He was carried from his work in a hack two days after, and was in bed when he sent for my belt. It oured him. Get it before you are laid up. It will cure you quickly, and your trouble will never come back. Call and see it; or sent for book of proof. Send this ad.

Dr. M E. McLaughlin, 906 Market St.

MARKETING PUBLIC LANDS.

TUESDAY

getting white homesteaders. It is startknown very little indeed about the the world there will be parity of values quantity, quality and geographical position of our public lands, and there was

to offer as in the case of Oklahoma, nolulu as a mid-seas capital but Hawaii has this advantage over With all the advantages in prospect be driven from the suburbs of the city
Back in central New York cabbages are
now quoted at \$1.75 per ton, here they
sell at ten cents a pound and upwards epoch in Island history

pleasure in the exercises which will rive years and the control of antiquity, seems to word as a marvel of antiquity, seems to word has been received of the sudden have been made with tools we class as death of Ho Kee, a well known Chinese modern. From evidence collected at tailor of Paia, Maui Death was sudsell at ten cents a pound and upwards epoch in Island history.

Gizeh, W M Flinders-Petric concludes den and a coroner's jury examined into and the high lands produce them to the Queen's taste. Even castor beans which grow like weeds any where produce crops which sell locally for \$60 a ton Coffee only awaits a bounty or a favorable tariff and the vanilla bean has immense possibilities. The wooded country might be made to produce gincountry might be made to produce ginseng Pineapple openings are attractive and the man who will raise an improved grade of bananas can sell them the name of Mackay To the man deat a surprising figure There is plenty of public land in Hawan suitable for the plans which are so near to fruition dum some one or two of these products and and to his son and worthy successor the Advertiser feels sure that if it is will be sent on that opening day an put on the market in the right way it "Aloha" which will represent the good will be quickly taken up by an industrious class of people Why not?

A Federal official, in answer to a question put by the Advertiser yesterday, said he thought the available public lands ought to be given away in small tracts to applicants who would der the American flag, quite agrees seaports with him The returns to the Territorial Government would be found in a wast increase after five years of tax- they have to hold up a tramcar able property and in the steadying influence of a larger white vote while the benefit to the people would be seen from the start in an increased demand for the articles of trade which white settlers require Better far better a hundred small farms given free than one immense tract turned over to a cattle raiser at a nominal rental The big cattle ranches kept California from getting ahead in population for a period of twenty-five years

But methods are things of detail the main thing is to put up the land in some reasonable way and give the American farmer a chance at it This is what is coming and in it is a bles sing for Hawah which cannot be over-

THE VENEZUELA INCIDENT.

The next mail from the coast may bring some interesting stories from the Caribbe in sea - At last advices British | and G rman ships were c nverging on La Guavra the seaport of the Vene zuela mital ticillect a long overdue deb at the anneng mouth and hove ering near was the strongest fleet ever c) ted under the American flag and one which was about to pass under the personal command of Admiral Dowes I ! was anticipated that Dewey's scheme of n in uvers yould take him close to the sine fixed German operations his busines being to exercise moral prosure hib half fithe Minrie doc

America, the United States and Great Britain have a perfect identity of interests

Venezuela itself takes the form of a seizure of the custom houses and their administration until the Anglo-German debt is paid. With this procedure the I nited States would have no more to do than had Great Britain with our determination to get pay of Turkey Mediterranean We shall simply stand mindful of the need, which North Americans as well as Europeans feel, of teaching the Latin American countries the sanctity of contracts

CABLE DAY CELEBRATION.

Cable Day will be made one of the memorable occasions in Honolulu's The Territory is now in the way of chronology, and fittingly so, for the arrival of the Silvertown, with the end ing out on the right track. It proposes of the copper wire which will bear so they have not been advertised before, meaning, will be an event second only deep, several years using the island press and perhaps some in importance to annexation. It will mainland apers as descriptive me- mean, as did the other, stability, for diums Hitherto the general public has with knowledge as to the markets of

a genuine wave of surprise when the It would be impossible to enumerate Advertiser announced two or three the variety of ways in which electric years ago that there were 90 000 acres communication with the world will tend of such property on the island of Oahu to make Hawali a business center alone. Hereafter the light will be Already there are to be seen the signs turned on and the public will know which indicate the coming of greater precisely what there is available We miss a fair guess if the policy if theroughly carried out, will not bring on a tion with the South Seas and with the rush of the very best class of settlers
It is true as Commissioner Boyd from Sound ports there will be an adpoints out that we have no big tracts ded evidence of the importance of Ho-

Oklanoma that a living can be made on it would be unlike Honolulu to permit small tracts Twenty acres here will the day of the opening of the line to go further than 160 acres there True. pass without ceremonious celebration much of the land is rocky, but Mr Governor Dole sounded the note when Buchholiz has shown what such land he declared that he favored a people's car be made to yield Sisal is a fine day with music, addresses, public rebe grown on rocky land and where eggs a mere formal banquet where the few proaching from about 3000 yards, some are five cents apiece and broilers seven- might voice their rejoicings. The four artiflery officers failed to discover the ty-five cents chicken raising is a pretty committees will frame such a program guns until they had advanced to within fair thing So is turkey-raising Hog as will enable the various elements of 1000 yards, ranches are immensely profitable, so our cosmopolitan population to find are the duck ranches, which will soon pleasure in the exercises which will

duction of coffee and the fact that the of the northern waters has been assign- sight, however, is gone, and his ear steamship Zealandia will carry two ed to each country, and simultaneous drums are shattered.

Highwaymen are poor indeed when

THEY WILL REMAIN. The bump of reverence is over, shadowed by the bump of intelligence in the 20th century man and woman. Old things are not preserved simply because they are old Whatsoever is no longer useful must get out of the way. Nevertheless, progress that is not intelligent will not be per-manent. We shall continue to breathe air, drink water and eat bread. There will be no "improvement" on the great essentials of living, and we do not want any. Babies will come into the world as they have from the beginning, and people will die out of it as they have done since the world began. Let us not run away with the idea that all of our treasured opinions are to be upset. Through every change, all standard articles which, like WAMPOLE'S PREPARATION have builded a reputation on honour and good service, will hold their place. This effective remedy belongs to the past, the present and the future. It is not only up to-date but ahead of date For Wasting Diseases, Impaired Nutrition, Influenza, Lung Troubles, Impure Humors in the blood with resulting skin affections, etc. it possesses the confidence of physicians and the people everywhere. It is not expected to fail, it never does fail. The formula after which it is made is an inspiration. It contains the nutritive and curstive properties of Pure Cod Liver (b), extracted by us from fresh cod livers, combined with the Compound Strup of Hypophosphites and the Extracts of Mali and Wild Cherry It is palatable as honey, and yet so medicinal as to be effective from the first dose Professor Relay, of Canada, says "I have much pleasure in stating that I have used it in cases of debility and have found it to be a very valuable remedy as well

as pleasing to take "It cannot

disappoint" Sold by chemists.

Plan for General Combination of Farmers.

Plans for the making of a market for the products of the small farmers of the Territory of Hawaii are under consideration by many of those who are hopeful that the time may come when the small fruits and vegetables which are offered to Honolulans are grown by the citizen farmers. There have been many experiments made looking to the establishment of a market in this city which shall provide the means of distribution for the product | of the farms, but as none have been successful a method of cooperative handling is now being discussed. The men who have taken an interest

in the preliminary discussion of the feasibility of the plan have taken as their starting point the securing of space in the Fish market where the farmers may put together their fruit and garden truck, and where it is thought the people who go to the Esplanade for the purpose of finding their supplies fresh will give attention to the display of products from the various small estates of the Islands. has been argued that with stalls which would afford space for fine displays of the produce there would be no difficulty in convincing the people that there ipplnes. they could be well and cheaply served with the best of eatables.

The plans so far looked into by well wishers of the small farmers contemplate as well the service of regular customers throughout the city by wagons such as are used by the huck sters in other cities, and which could have regular beats through the city, serving those who are on the routes and who have signified their intention to take the products of the citizen i growers, rather than the greens provided from the present sources. Inia would make it possible for the members of a cooperative company to be assured of the best chances of disposing of their goods, and thus avert any danger of differences when the produce of one grower seems to be pushed ahead of that of the others.

Superintendent of Public Cooper said, when the matter was called to his attention, that the government would do all in its power to give the farmers aid so that any such experiment as suggested might be made a success. There was, however, he said, nothing that could be done beyond the granting of the very best space possible in the Fish market, which could be arranged easily. There has been a row of market stalls taken out of the building, and these can be replaced so that there will be plenty of that they will make an effort to gain given out. entrance into the local market in this desirous that the small farmers should for two years for complicity in the have every advantage possible, so that | boodle cases. they might find a satisfactory market for all kinds of fruits and vegetables, anti-Socialistic speech advising work. Mr. Emery, their homesteads.

It has been said that there has been in the past exorbitant charges made to the farmers, especially to the Wahia- dental discharge of his gun near Sweetwa colonists, for the sale of their One statement was that the commission was of 50 per cent, and in at all from consignments. D. C. Camarinos, who handles consignments from all over the Territory, as well as from the mainland, said yesterday that the usual charges here were 10 per cent; in fact, he did not know of a single instance where more was charged for the selling of the products of the farm. On the Coast, he said, the charge was 8 per cent, and it was considered that the service here was worth the added commission.

It is thought probable that there will be an effort made to secure a combination of many of the small farmers here on some plan for cooperation in selling products, in which case a practical experiment may be made in the having of a series of stalls in the market..

The Humbert Case.

PARIS, December 6.-There was an unprecedented scene in the Chamber of Deputies this afternoon over the Humbert case. Members of the Right party party members. The Premier, Vi. Combes, was forcibly ejected from the rostrum and the sitting was suspended amid intense excitement turbance arose when M Vallee, Progressive Republican, described Frederick Humbert as a "Boulangis; deputy."

TO IMPROVE OUR MONETARY SYSTEM

INDIANAPOLIS (Ind.), December 6,

"What further steps should be taked at this time for the betterment of our monetary system?" Mr. Hugh H. Hanna was asked today.

Mr. Hanna was chairman of the

executive committee of fifteen created by the National Monetary conference held at Indianapolis in 1897, and ever since he has been active in pressing the demands of financial reformers: 'First," he replied, "our gold stand-

ard law of 1900 should be strengthened by machinery for maintaining parity between gold and silver. The public mind is prepared for as perfect a gold standard as can be established. A lay silver at the treasury on demand is the one remaining step necessary to secure bill, introduced in the last session, make full and wise provision.

"Second, an element of elasticity in our National Bank currency should be provided. A small step, equal n amount to say 10 per cent of the capital of the bank, is sufficient for demonstration of efficiency and safety.

"If its desirability is proved, grallual increase within a term of years to say 50 per cent of the amount of the capital, with full and unquestioned provision for the redemption of notes of insolvent banks as afforded in the Lovering and other bills, is the other step immediately necessary.

The general subject appears complex to study it. The principles are simple. The humblest citizen is interested in the perfection of money laws.

JARED WILL BREVITIES RAISE CORN

Experiments Will Be Made on Maui.

Jared G. Smith, Director of the United States Experiment Station in Hawaii, will soon begin a series of experiments in corn growing in the Kula district on

Corn and potatoes are the principal articles of produce raised on Maui, aside from sugar cane, and the experiments already made with potatoes were a sucess, which has wonderfully improved the methods formerly in vogue there. Thousands of acres are planted in corn in the Kula district, but of late years the crops obtained from the land have been comparatively small while the corn is of an exceedingly poor quality. Blight has also aided in the destruction of the corn crop and the Kula farmers were very much discouraged with both corn and potatoes until the United States began to assist them with

"The trouble with the farmers in the Kula district," said Director Smith yesterday, "is that they have ben raising corn on the same land for so long a period, that the soil is worn out. They have been planting corn for thirty or forty years and while fine crops were grown all during that time, the land is just about played out now. Then too, they have been cultivating potatoes by hand exclusively. A piece of modern machinery has never been seen up there, and a hoe and a shovei are about all the farm implements now in use on the Kula farms.

"What is required there now is fer tilizer for the soil and rotation of crops. priating \$50,000 for the expenses of the The United States Agricultural Department will soon inaugurate a series of experiments in the Kula district for the benefit of the Maui farmers. I expect to go up there in February but the experiments will probably begin before that time.

"Extensive tests will be made with the worn out soil to learn what is need-A measure has been introduced in ed to bring it back to its former state of fertility, and experiments will then be made to find the fertilizer required. Then rotation of crops will be tried. Corn has been grown in this district exclusively, for years, and it is our intention to alternate corn and beans. Beans, I believe can be successfully grown in that district, and will be of explosion of the Progresso at San benefit to the land." -Mr. Smith has also ordered for thes

Six deaths in St Louis, all due to experiments a number of pieces of modoison, are said to have been the re-tern farm machinery, which no doubt sult of an attempt to defraud insurance, will be a revelation to the Maui farmers and their former crude methods. A cultivator, a corn planter and a stock allied Mrs. Gore, expected to make her cutter have been ordered and are now on the way. The first piece of machindan. The stock cutter will be used to cut up the corn stocks and they will then be plowed under as a help to the soil, instead of being used as fuel as at present. All the machinery ordered is to be operated by horse power, and Havemeyer is interested in Top mine in Southern California and the mode of cultivation practiced by the Kula farmers, and educate them up to the modern methods of farming.

THE LABOR ISSUEINTHE ISLANDS

(Continued from Friday's Issue)

In the opinion of the managers and owners of the plantations, the Japanese are by far the best workers. They are capable of any work and must be considered as the mainstay of the plantations. They are very quick to learn and easy to manage, being a very peaceable and contented set of men and women. Governor Dole speaks most highly of their conduct and the value of their work, while the general opinion of the authorities is that the Japanese can improve things as well as imitate them. Professor W. D. Alexander, President of the Board of Education in Hawaii, said of them in 1895:

"They manifest an increasing tendency to settle permanently in the Islands with the approval of their government. Under the 'most favored nation' clause of the treaty of 1871, the Japanese government has claimed for them entire political equality with any other class of foreigners in the country. Their characteristic traits are well known. Their competition with white traders and artisans is even more dangerous than that of the Chinese. They are versatile, ingenious and ready to learn new methods. No race in this i country appears to be more tenacious! of its nationality or less inclined to renounce its allegiance to its home government and to become thoroughly identified with Hawaii.

The Japanese spend more money than do the Chinese and rarely send money back to Japan, preferring to settle in the Islands and bring their families. Not only on the plantations do the Japanese predominate, they are everywhere and in every branch of trade and labor-builders, storekeepers, barbers, contractors, stevedores, laborers and domestic servants—to mention no others. At every turn the Japanese are to be met with, and generally very prosperous and comfortably settled. An idea may be formed of the extent of the Japanese interests in Hofire of 1900. This fire was accidentally started during the plague visitation, Honolulu—only a comparatively small

part of the whole city area. Some statistics as to the relative education of the races may be of interest In 1898 it was estimated that 85.28 per cent of the Hawaiians and partdismissed and the manager received a The planters are turning in every diwork on the plantations!

It is thought that if Cuba is given ficult question how to supply the planthe sugar industry is too important a Treasurer by Governor Dole. one to be allowed to die out, however it may be hampered by paucity of la-

SUGAR IS HAWAII'S KING. The Hawaiian Territory is essentially a sugar country, nearly all of those who once planted coffee having converted their plantations into sugarcane fields, finding it more profitable to sell their came to one of the mills than to grow coffee. This is to be deplored, because it makes it unlikely that Hawaii could stand any accident. to the sugar industry and makes the authorities of the Islands strain every nerve to supply the labor market. At present the Hawalian sugar output is one-twentieth of the world's output. and it is likely to increase rather than diminish. In 1898 the value of the sugar industry was nearly \$40 0000,000 and the export was valued at \$15,615 -109 out of a total export of \$17,346,744. while in 1900 the export amounted to \$21,898,549 These figures show how espential the sugar industry is to Hawall, without it the total exports for 1895 would have been only \$721,405, as compared with imports valued at \$11,650,660

with the signs pointing to an early arrival of the cable connection with the mainland, the advance in sugar, and the growing interest of Coast investors in Hawaiian shares, there seems an outlook for the new year opening with a rush of investments. The Coast buyers are actively enlarging their holdings of shares in local corporations, and according to the letters of one San Francisco broker the buying is going ahead too fast, and there may be a reaction, though the majority of the purchases are on the solid foundation of investment, and not on the precarious speculative basis.

Some signs of the same feeling are evident in the local market, but the lack of ready cash in the local field makes it impossible for the investors to secure all the stocks they want. There is comparatively little to record of local trades except the sales of Ewa during the week past. This stock was forced up from \$23 to \$24.25 but a reaction of one-eighth occurred at the close of the week. The buying does not in any way seem to dull the interest in the market, as there are both buying and selling orders out although the fact that there is a small difference between the traders prevents more sales. There is a feeling that higher prices will result before the rates soften ma-

The general market is higher though the sales of the week have been few and the outlook is not for any material buying before the first of the year. There have been transfers of Oahu, Rapid Transit and Inter-Island at prices which now show improvement and the only thing that may be done now is to wait for the easing of the money market, which will come with the creation of long credits on the mainland, through the going forward of the new crop sugars. The improvement in the price of sugar is primarily at the bottom of the advance which is being noted all along the line in sugar shares. The near approach to four cents a pound means the marketing of the next crop. if the price is not-a forced one, at rates which compared with those of last year mean the difference between poverty and affluence. In the event of the next crop going on at the prices which are expected to rule at the beginning of the year, there will be an increase in the returns for the entire crop of close to three millions of dollars.

The sales of Ewa during the week, at \$24 amounted to 345 shares, and in addition to these there have been private sales at a higher figure. Sixty shares of Pioneer Mill, at the regular rate, \$85, were recorded, and 129 shares of Oahu, which is now held at \$90, an advance of \$2.50 over the last previous sale. Kinei sold in a block of eighteen shares at the ruling rate of \$7.50 and McBryde in the amount of 140 shares, the price being \$4.75. There were sold seven shares of Inter-Island Steam Navigation Company at \$97.50 which is an advance, and ten Rapid Transit went at \$57.50 also \$2.50 above the last sales.

The Stock Exchange is making arrangements for taking advantage of the coming of the cable. There will be a plan for the receiving of the quotations of the eight stocks which are now listed on the San Francisco Exchange, and it may be, if the interest of the people there in sugar increases, there will be other stocks listed. The reports of the session of the Coast board in the morning will be received here in time for the early session, and the afternoon report will come before the later session is held. The intention is to renew the two sessions a day, and there will be added interest through the coming in of the Coast dealings. Several of the brokers will have daily reports as

It is understood that there will be changes in the personnel of the men-bership of the exchange after the next meeting W M Giffard is reported as about to withdraw and the seat, it is understood, will be occupied by H.

There has been nothing to record in the sales of real estate other than the mansfer of some small building lots. The business property market ps slow and there seems little chance of an early recovery. The contest over the site for the postoffice is now on and there will be little done perhaps until this

The progress of the downtown building- is rapid and there will be occupants in the stores very soon. The Kamolan, Estate structure is delayed for lack of material. The Young building is n w occupied by several tenants and the moving into the Lewers & Cooke building is going on

Diedrich, at Bremen, who furnished the State Department much material from time to time regarding the sugar industry, has forwarded under date of October 10 a lengthy article about the cultivation of beet seed from imported mother seed. His article is as fol-

question.

is imported, mostly from Germany and France, where specialists have for strong nitrogenous character, but only generations, through scientific methods with nitrate of potash or phosphoric and the strong nitrogenous character, but only to the strong nitrogenous character, but only the strong nitrogenous character, but onl growing seed for beets with high sugar contents. But imported beet seed is expensive, and therefore efforts are being made in diverse sugar producing countries to grow the supplies needed at home. The success thus far has been rather indifferent, particularly in the United States, as I am Informed Even if the grower has all the scientific experience necessary and is fully equipped as to details, he still has many more difficulties (those originating from our soil and climate) to contend with than the foreign seed grower Thus it is a well known fact that many kinds of high-grade seed will degenerate more rapidly in our country than elsewhere but of late years considerable progress has been made in this direction and there is every reason to expect that ere long American home grown beet seed will reach the standard that has been attained iv the growers in Germany and France

'I desire to call attention to a method which has been employed by Russian growers of seed during recent seasons and has proved very successful They import German mother seed seed with all the qualities of the original. In this way it is said they get marketable beet seed cannot also be

ported mother seed The mother seed is sown with a machine drill in rows that are

year, the growth of the small seed beets will be retarded, but they will attati a very high percentage of sugar. and y pushing them the second year with strenuous fertilizers, they will yield a heavy crop of fully developed The best climate is that in which dry weather predominates in the all After the stalks have been cut, they should be protected as much as lossible from the wet, otherwise the seed lose their virtue of germinating. All seed that is well matured and is toroughly dry and been brought to sheler without being again exposed to damp weather will germinate quickly. Of ourse, there will be details in this. as a every other business, which will haw to be found out by experience, but the general principles of this menod of producing home grown beet seeqwill be readily adapted to the variatics of our climate and soil.

"he contracts for German mother see sold to Russia are made on the following basis. The seed is furnished on ondition that the seller will ultimaely get \$1.70 for every 100 pounds of seet seed harvested To protect hinself, he at the same time demands that if the crop should be a failure he gets \$160 for each sack of 110 pounds of mother seed, of which \$119 persack must be paid in advance, upon delvery of the seed. At first, this seens to be an extravagantly high prie, but when it is borne in mind that one sack of mother seed will yield ordnarily, at the end of two years, 1 fig sacks of beet seed (worth at the prsent market price of \$8 per sack. abut \$1,100) it will be admitted that th cost is none too high, and that the exeriment is worth trying."

ERNEST G. WALKER.

The action of the English House of Commons in approving the Brussels strar conference was by no means unexpected. For a number of months pat the Cobden Club has been energeically employed in sending out leafles and circulars urging that the actim in question should not be taken. beause it constituted an infringement uon the rights of the English consimers. If the French, the Germans the Austrians and Russians were willig to provide the English people with sigar at 3 cents a pound which cost tiese various foreigners from 31/2 to 4 tents a pound to produce, the Cohden Cub argued that it would be practical ly flying in the face of Providen of to, pit up a barrier in the way of this entirely unsolicited benevolence. It has furthermore been pointed out by these same authorities that, in consequence of the low price at which foreign-made mear could be purchased in England it was made possible for the English nanufacturers of jellies and preserves to sell these goods in all parts of the world at a price which almost defied ompetition While there is a good deal to be said in favor of the contention of the Cobden Club in this matter here is, on the other hand, the potent argument that what England proposes to do by the acceptance of the terms of the Brussels conference is to bring trade conditions into a more natural and hence healthy state than that in which for years past they have existed The basis of free trade, as properly understood, is to discourage artificial trade conditions, either those of bounty or protection, and it is a species of indirect protection to enjoy privileges at low prices which are secured by an unjust tax wrung from the people of a neighboring country. It seems to us on this account that the stand which the Cobden Club has taken in this matter is both ethically and economical vunsound, and that it is not in accord-

Hair 55 Inches Long Grown by Guticura.

-, sends us through our British Agents, Messrs. F. NEWBERY & SONS, 27 and 28, Charterhouse Square, London, E. C., a strand of soft, glossy hair cut from her own head and measuring fifty-five inches in length,

of which the annexed drawing is a photographic fac-simile. She attributes her magnificent head of hair to frequent shampoos with CUTICURA SOAR, followed by light dressings of Curicuna gently rubbod into the scalp. Previous to the use of Cuti-CURA, her hair was dry, thin, and lifeless. and came out in handfuls to such an extent

that she feared she would lose soon it. This is but one of many remarkable cases of the preservation and restoration of the hair in seemingly hopeless cases by warm shampoos with CUTICURA SOAP, followed by light dressings of Cuticura, purest of emollient skin cures. This treatment at once stops falling hair, clears the scalp of crusts, scales, and dandruff, soothes irritated, itching surfaces, stimulates the hair follicles, supplies the roots with energy and nourishment, and makes the hair grow on a clean, sweet, wholesome, healthy scalp, when all else fails.

MILLIONS OF WOMEN use CUTICURA SOAP exclusively for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore handr, and for all the purposes of the toilet, bath, and nursery.

Complete External and Internal Treatment for Every Humour,

Consisting of Currettax into the cleanse the skin of crusts and scales and soften the this kened stutis le, fig. 1. As attent, to instantly allay it ming, inflammation, and irritation, and soothe and is a life internal Resolvent, to cool and cleanse the blood. A Single Stocked and the first text termines of the first salt, and humiliating skin, scalp, and blood humours, with loss of hair, when all else fills. Sold through at the world.

OIL FUEL IN USE ON **STEAMERS**

Sir Marcus Samuel has just called the attention of the British public to the possibilities of the future in con- large, 5 degrees; highest temperature nection with the substitution of oil for coal as a fuel for steam vessels. The Company has made a successful trip. Mr. Melrose of the the United States Stmr. Wasaleale, Piltz, from Kaual Navy Department predicts the use of oil in the near future as fuel for war vessels. They might have gone farther S S Zealandia. Dowdell, from San and told of the remarkable conditions now existing on the Pacific Coast of grains per cubic foot; normal, 6.9 the United States.

There fuel oil has long passed the experimental stage. Over fifty steamers now sail from the port of San Francisco with oil for fuel. The Mariposa has just returned from Tahiti, a re- piolant park, 5.38; normal, 4.05. Gas. schr. Eclipse, from Maul and turn trip of 7,200 miles, under steam generated exclusively by oil. Pressure and speed were easily maintained, and she reached port one day ahead of her schedule. Her fuel cost just half as level for the month was 10.13, the as much as coal; there was no expense sumed appual mean being 10.00 above for painting ship, such as is necessary datum. when coal is used.

Particularly interesting is the opinion of Lieutenant Winchell, who has reported on the voyage for the United States Government, as to the character of man that should be employed in the fire rooms where there is an oil fuel S. S. Peru, Robinson, for San Fran-installation. It neither requires physical endurance nor previous training with coal fire. The men placed in Stmr. J. A. Cummins, Searle, for charge of the contrivance, however. should have mechanical aptitude, and readiness of resource and

The sense of sight, hearing and touch must be exercised at all times. since it is essential to keep a good look-out on the furnace to note by the sound the working of the blowers and the completeness of combustion, and to Per stmr. Kinau, Dec. 13, from Hilo check by the sense of touch the workand way ports—H. A. Isenberg, P. H. ings of mechanical contrivances. If Funke, J. W. Bergstrom, C. W. Ash- fewer men are needed in the fire rooms ford, P. W. Severson, F. J. Amweg, F. it is requisite to secure men of high

THE MONEY SAVED.

Less space was occupied, the fixed good, Mrs. M. Louisson, J. Moritz and charges for labor were greatly reduced, wife, Geo. M. Robertson, Mrs. G. J. the feeding of the fuel took less time Becker, Father Mathias, N. C. Wilfong, and cost less. In fact, no disadvant-L. M. Whitehouse and wife, Dr. R. H. ages were discovered, and the advant-Heid, H. Cannon, J. Bicknell, A. M. ages were manifold. It is estimated Atwood, George Wilson, N. G. Aon, G. that on one troopship making the trip F. Maywell, Chang Leing, John Radin, from San Francisco to Manila and re-V. J. Robinson, Major Harris.

Per stmr. Ke Au Hou, Dec. 14, from use of oil has been at least £5,000 for

every such voyage... The result of the lack of demand for coal is remarkable. In San Francisco Kauai ports—A. S. Wilcox, Mrs. A. S. harbor alone fully £600,000 worth of heavy northerly blow of the 22nd. Wilcox, F. B. Newton, A. V. Gear, E. capital in ships has been forced into Heavy swell, 6th, 10th, 14th to 20th; and capital in ships has been forced into J. Walker, C. B. Hofgaard, Chong Kee, idleness. Shipowners and shippers no 25th to 30th. Lightning, Hawaii, 29th, Paa On, C. C. Henion, A. Fries, Ah Tan, longer find it profitable to voyage to 30th. Snow fell on Mauna Loa and Mrs. J. O. Lutted, E. Cremer, Miss S. Japan and Australia and return to San Mauna Kea 16th, 29th. Earthquake Cremer, J. M. Coulson and thirty-seven, Francisco, awaiting cargoes of grain to Europe. The competition in carrying Per stmr. Claudine, Dec. 14, from the small imports of caol has been so Maui ports—J. F. Hackfeld, Mrs. Davis, keen and the freight rates are now so in the pit of the lake. In C. Kaiser, R. Catton, C. W. Ashford, low that the ship owners prefer to have ten days action subsided.

NOTICE OF CORPORATIONS

The attention of officers of Corporations is called to Section 2024 of the

cational shall annually present a full and accurate exhibit of the state of its affairs to the Treasurer of such times as the Treasurer shall direct. The said Treasurer shall have power either himself, or by one or more commissioners appointed by him, to call for the production of the books and papers of the corporation, and to examine its officers, members and others touching its affairs under oath. The annual reports above mentioned and the result of such examination, the Treasurer may in his discretion lay before the president and also publish. In case any such corporation shall refuse to produce its books and papers upon the request of the Treasurer or the commissioners appointed by him, or in case any of the officers or members of such corporation shall refused to be examined on oath, touching the affairs of the corporation, then the Treasurer or the commissioners, may apply to the Court of Chancery for an order to compel the production of the books and papers, or the examination of such officers or members and orders."

"Section 2024. Every corporation not

eleemosynary, religious, literary or edu-
